

RGBW LED Slim Panel **ARANI**TM Installation Instructions

Android

iOS

Download and Open the App

Search for “SmartLife” in the App Store, or scan the QR code to download the app.

After installation, register and log in.

Adding a device

1. Open the Smart Life app and tap the plus button in the upper right corner.

2. Confirm the light is flashing white rapidly.
Enter your Wi-Fi network name and password.

3. If the recessed light is not flashing rapidly, toggle the switch off and on 3 times (each interval within 1 second).
The light will then flash once per second, indicating it has entered pairing mode.

Note: Connect to a 2.4 GHz Wi-Fi network. The device cannot connect to 5 GHz networks.

Mobile App Operation

1. Select Dimmer to adjust colour temperature and brightness.

2. Select Dimmer to set the colour you want.

3. Select Scene to choose a preset suited to your space.

4. Select “Music” to sync the light rhythm to sound picked up by the phone microphone.

5. Select “Setting” for more functions.

Control multiple lights as a group

1. Tap the edit button in the top right corner of the screen.

2. Choose "Create Group".

3. Tap the plus button to add the devices you want to control together.
4. Rename the new group.

Troubleshooting

Cannot connect to your Wi-Fi network: confirm you entered the correct Wi-Fi password during setup.
Check for any internet connection problems.
If the Wi-Fi signal is weak, reset your router and try again.

Reset the device: to reconnect to Wi-Fi, switch it on-off-on-off-on to reach pairing mode, indicated by a rapidly blinking white light.

Frequently Asked Questions

Q: The device does not enter pairing mode.

What is the next step?

A: Repeat the "on-off" sequence three times with a one-second interval.

Q: Can the device be shared with family members?

A: Yes. Tap Share Device on the settings page.

Q: How many devices can I control at once?

A: It depends on your router. The app sets no limit.

Q: What should I do if the device appears offline or unreachable?

A: Confirm your router is online and in range, and that the app is up to date. If power is connected but the device is not responding, switch it off for about two minutes, then restart it.

Q: What is the wireless range?

A: It depends on your home router and the conditions in the room.

Q: If my internet goes down, will the Smart Life app still work?

A: Yes. The device can also be controlled over Bluetooth at close range.
Make sure your phone Bluetooth is on.

Q: There is no connection. What should I do?

A: Restart the device or the router.

Q: Is the device dimmable?

A: Yes, but dim it through the app. It does not work with a wall dimmer.

Q: Does the device work with 5 GHz Wi-Fi?

A: No. It works only with 2.4 GHz Wi-Fi.

Alexa setup

1. Open the Alexa app and log in.
2. Search Smart Life under Skills and Games.
3. Tap Enable to use, then link your Smart Life account.
4. Authorize the link between your Smart Life account and Amazon Alexa.
5. Once linked, ask Alexa to discover devices. The device can then be controlled by Alexa.

To control multiple lights, create groups in Alexa. Groups created in Smart Life are not synced to Alexa automatically. Alexa recognizes the group name set in the Alexa app, or the device name set in Smart Life.

Once set up, you can say: Alexa, turn on or off the device. Alexa, set the device to 50 percent. Alexa, brighten or dim the device.

Google Home setup

1. Open the Google Home app and tap the plus icon on the home screen.
2. Select Set up device under Add and manage.
3. Tap New devices to set up new devices in your home.
4. Tap Works with Google to authorize Google Home to work with your Smart Life account.

Once set up, you can say: Hey Google, turn on or off the device. Hey Google, is the device on or off? Hey Google, brighten or dim the device by 50 percent.
